SCHNEID service adapter USB for communication with all SCHNEID module controllers

|	
Order number:	**020.15278**
Order code:	**SERVICEADAPTER USB**

Overview:

The SCHNEID service adapter USB is used for quick parameterization of the control device.
The adapter is plugged directly into the COM port of the controller (if a COM base is available, the ribbon cable must be disconnected beforehand)
The adapter is suitable for all control devices with a 10 or 14-pin COM connection.

1. Connect the service adapter to the PC with a micro USB cable

2. Depending on the operating system, the driver is installed itself or a manual installation is requested. The USB drivers are included in the enclosed USB memory.

3. Check the port number in the device manager:

4. Start the parameterization software

With "Port:" the port number must now be set according to the device manager (here "COM3" in the example) If the port in question does not appear in the selection list,

a   has to be carried out first.

After the baud rate and address have been set according to the controller, the data is read out using   .

The parameter tool can be obtained on the homepage www.schneid.at under "Download".

Interface connections:
Controller connector: 10-pin
Micro USB connection

Scope of delivery:
SCHNEID service adapter USB for communication with all SCHNEID module controllers with COM connection; Includes micro USB cable.

Technical specifications:

Intrastat Number:	8537.10.91.90
Country of origin	EU/AT
Height, width, depth (in mm)	40x34x24mm
Weight (in kg)	0.0524 kg
Degree of protection	IP-65
Ambient temperature	0°C....+40°C
Connection type	Micro-USB-Anschluss
Mounting type	Adapter
Degree of pollution	2
